Skills

Programming Languages

• JavaScript, TypeScript, Python

Frameworks & Libraries

• Next.js, React, NestJS, Express.js, Redux

Databases

• SQL: PostgreSQL, MySQL

• No SQL: MongoDB, Redis, Neo4j

Testing & QA

• Selenium

Infrastructure & DevOps

• Node.js, Nginx, Docker, CI/CD (GitHub Actions)

Architecture & Scalability

 Microservices, APIs REST/GraphQL, WebSockets

Agile Methodologies

· Scrum, Kanban

Experience

FULLSTACK DEV

2024 - Present

Anysolution (Full-time contract)

- · Refactored public endpoints into Next.js Server Actions, optimizing SSR and performance.
- Built dynamic forms with full-stack validation and nested parentchild routing.
- Used TailwindCSS and RadixUI to develop modular and scalable UI components.
- Led full Docker-based deployment: Next.js, Keycloak, MongoDB RS.
- · Integrated Prisma ORM, reducing reliance on raw queries and improving maintainability.
- Mentored two interns in DevOps, Docker, and deployment best practices.

FRONT-END DEV

2023 - 2024

Illadocs, Gladtolink (Full-time contract)

- Complete UI redesign while maintaining compatibility with the legacy backend
- Implementation of a design system using TailwindCSS and Radix UI
- Documentation and development of reusable components with Storybook
- Performance optimization for loading and SSR using Next.js
- Progressive integration of TypeScript into a JavaScript codebase

Languages

Spanish (native)

English - Upper Intermediate (B2)

About me

Fullstack developer building scalable, user-focused web applications using modern technologies like Next.js, NestJS, and Docker. Strong frontend foundation (TailwindCSS, Radix UI) combined with backend expertise (Prisma, REST/GraphQL APIs). Passionate about clean code, team culture, and product quality.
